

## Available EGP Firm Forward Capacity (TJ/d)

Last updated 20 September 2019\*

Year	Jan	Feb	Mar	Apr	May	Jun	Jul	Aug	Sep	Oct	Nov	Dec
2019										30	30	30
2020	41	41	41	58	58	58	58	58	58	51	51	51
2021	100	100	100	107	107	107	107	107	107	100	100	100
2022	174	174	174	181	181	181	181	183	183			

## Available TGP Transfer Service - Class A Capacity (TJ/d)

Year	Jan	Feb	Mar	Apr	May	Jun	Jul	Aug	Sep	Oct	Nov	Dec
2019										37	37	37
2020	43	43	43	43	43	43	43	43	43	43	43	43
2021	49	49	49	49	49	49	49	49	49	49	49	49
2022	97	97	97	97	97	97	100	100	100			

The primary source for our capacity forecasts is our annual EGP asset report that presents the outcome of our capacity planning engineers' (at least) annual review of the pipeline hydraulic modelling. This report confirms the most up to date and accurate modelling representation the physical pipeline system, and is used for capacity management, control room, expansion and works planning, day-to-day operation, maintenance and outage planning, and emergency management and survival time. This report's modelling is our reference for the current EGP pipeline capacities and linepack for the varying scenarios of summer and winter periods and operational compressor maintenance.

We then overlay known sales and contract terms, and forecast loads against these to identify the capacity available for sale.
