<sup>a</sup> A tariff code starting with the letter "F" indicates that the tariff attracts the Premium Feed-In-Tariff rebate. Tariff reassignment requests to a tariff starting with the letter "F" can only be made by the customer's retailer.

<sup>b</sup> A tariff code starting with the letter "T" indicates that the tariff attracts the Transitional Feed-In-Tariff rebate. Transitional Feed-In-Tariff rebate is no longer applicable from 2017. Existing customers will remain on "T" tariffs until they / retailers choose to move to another tariff; however, no Transitional Feed-In-Tariff rebate will be paid.

<sup>c</sup> This tariff is closed to new entrants except for solar customers with a dedicated off peak heating circuit controlled by Jemena.

<sup>d</sup> The installation of an embedded generation by an existing customer is considered a change in load characteristic and as such the A180 tariff is not supported. The metering and data recording for a co-generation site has additional regulated requirements to that of a standard site. It is not technically feasible to meet these requirements and at the same time be able to separately measure, control and bill a load controlled heating.

<sup>e</sup> Other terms and conditions apply

The *Deemed Distribution Contract* and Jemena Electricity Networks' *Policy for Resetting Contract Demand* form part of the terms and conditions related to these prices. These documents can be viewed or downloaded from the following Website:
